OBJECTIVE

Performance-driven Full-Stack Developer and Master of Applied Technologies student (Thesis submitted) transitioning to a Post-Study Work Visa. Seeking a full-time role in Auckland to leverage expertise in Next.js, Supabase, and AI integration to build scalable, high-impact web applications.

PERSONAL STATEMENT

I am a dedicated Full-Stack Developer and international Master's student in New Zealand (Thesis submitted). With a background as a business owner and professional developer, I bring a unique blend of technical expertise in Next.js and Supabase alongside strong entrepreneurial accountability. I am passionate about contributing to collaborative Kiwi teams and bringing high value to the Auckland tech sector.

WORK HISTORY

WEB LAUNCH LIMITED

136 Broadway, Newmarket, Auckland
Jan 2025 - Present

Full stack developer

- Architected and deployed modern, full-stack web application using Next.js for the frontend and Vercel for serverless deployment.
- Engineered backend infrastructure using Supabase, including the implementation of Remote Procedure Calls (RPC) to integrate complex API endpoints.
- Optimized data performance by writing advanced SQL queries to join and manipulate relational data, ensuring efficient retrieval across multiple tables.
- Developed real-time features, such as instant messaging systems, while crafting responsive and intuitive UI/UX designs to enhance user engagement.
- Ensured scalability and maintainability of the codebase by applying modern development best practices in a fast-paced environment.

WordPress developer

- Designed and developed professional websites using WordPress and the Elementor page builder to create custom, responsive layouts.
- Managed end-to-end deployment and site maintenance using Hostinger, ensuring high uptime and optimized server performance.
- Implemented SEO best practices using SEOPress to improve search engine rankings, site indexing, and overall digital visibility.
- Customized web environments to meet client branding requirements while maintaining fast loading speeds and user-friendly navigation.

Burgerking West Gate

Auckland, New Zealand
Aug 2024 - Jan 2025

Team Member

- Immersed in New Zealand work culture, quickly adapting to local communication styles and professional expectations.
- Enhanced interpersonal communication skills by managing high-volume customer interactions at the front counter and drive thru.
- Thrived in a fast-paced, diverse team environment, maintaining high levels of accuracy and composure under pressure.
- Demonstrated strong reliability and work ethic while balancing full-time master's studies with part-time employment.

Mhendo Coffee Shop

Kathmandu, Nepal
Sep 2023 - Jul 2024

Business Partner / Barista

- Co-owned and operated a local coffee business, managing both daily service operations and high-level business functions.
- Demonstrated entrepreneurial leadership by overseeing customer service quality and ensuring the business met its operational goals.
- Managed end-to-end service delivery, from preparing beverages to handling customer transactions and feedback.
- Developed strong multitasking abilities, balancing the technical demands of business management with hands-on customer-facing roles.

Ek Solution Pvt. Ltd

Kathmandu, Nepal
May 2022 - Jun 2024

Frontend Cloud Developer

- Specialized in modern JavaScript frameworks, including Angular, React.js, and Next.js, to build high-performance web applications.
- Integrated advanced libraries such as Redux for state management, Tailwind CSS for modern styling, and Leaflet for interactive mapping.
- Delivered scalable frontend solutions by collaborating with design and backend teams to implement seamless user experiences.
- Utilized Cloud technologies and best practices to ensure efficient deployment and maintenance of client projects.

Ek Solution Pvt. Ltd

Kathmandu, Nepal
Jan 2022 - Mar 2024

Frontend Developer Intern

- Gained hands-on experience in professional software development workflows, focusing on core frontend technologies.
- Mastered framework fundamentals by assisting in the development of project components using React and Angular.
- Demonstrated rapid learning and technical proficiency, leading to a promotion to a full-time role within the first year.

Grid Pvt. Ltd

Kathmandu, Nepal
Mar 2017 - Jun 2018

Junior AutoCAD Draftsman

- Promoted to Junior Draftsman following the successful completion of the trainee program.
- Produced detailed structural blueprints for large-scale construction projects, including cricket stadiums and commercial buildings.
- Collaborated with engineers to develop technical drawings for memorial buildings and diverse structural frameworks.
- Ensured high levels of accuracy in blueprints to meet construction standards and project specifications

QUALIFICATIONS

Master of Applied Technologies | Unitec Institute of Technology, Auckland
2024 – Present

Thesis Title:

“A Seq2Seq Transformer Approach for InSAR Displacement Forecasting in Gisborne, NZ”

Impact:

Developed a deep learning framework using Transformer and LSTM architectures to forecast landslide risks in the Gisborne region. Achieved a 92% accuracy ($R^2=0.92$) in predicting ground deformation using Sentinel-1 satellite data and physics-informed data augmentation

Core Focus:

Deep Learning, Time-series Forecasting, Geospatial Data (InSAR), and Uncertainty Quantification

Relevant Coursework:

Cloud Computing | Cyber Security | Data Analytics | SQL Databases | Machine Learning | Web Development | Research

Bachelor of Science (Hons) in Computing (Grade: First Class) | Coventry University, United Kingdom
2018 – 2022

Thesis Title:

“Cloud Server Deployment for a Learning Management System (LMS) using Raspberry Pi.”

Impact:

Engineered a cost-effective, secure cloud-hosting solution for educational materials during COVID-19. Utilized Raspberry Pi, Linux (SSH), Nginx and OwnCloud to create a portable, secure server environment for remote learning.

Core Focus:

Cloud Infrastructure, Linux Administration, Network Security, and Open-Source Software

Relevant Coursework:

Kotlin | Databases | Node JS | Mongo DB | C# | Data Structures and Algorithms | Python | AGILE

TECHNICAL SKILLS

Category	Technologies & Tools
Frontend	Next.js, React, Angular, TypeScript, JavaScript, HTML5/CSS3
Backend	Node.js, Supabase (RPC), ASP.NET MVC, Python (Machine Learning)
Database	PostgreSQL, MySQL, MongoDB, SQL Databases
Cloud & DevOps	AWS, Azure, Vercel, Docker, Linux (SSH), Git/GitHub Actions
Specialized	Deep Learning (Transformers/LSTM), Geospatial Data (InSAR), AutoCAD
Design	Figma, Photoshop, Elementor (WordPress)

PERSONAL SKILLS

Strong Communicator:

- Proven ability to share technical ideas clearly and collaborate effectively within diverse teams.

Adaptable & Culturally Aware:

- Successfully transitioned into the New Zealand work culture, developing high levels of confidence in customer-facing and collaborative environments

Rapid Learner:

- Highly detail-oriented approach to learning, allowing for the quick mastery of new frameworks and technical processes.

Determined & Accountable:

- Known for taking full ownership of tasks and ensuring high-quality completion within strict deadlines.

Multilingual:

- Capable of communicating across different languages and cultures, enhancing team diversity and perspective.

AWARDS & VOLUNTEERING:

• GenAI Hackathon:

- Participated in rapid AI prototyping and development (Oct 2024).

• Enrollment Assistant (Volunteer):

- Assisted with freshman intake at Prime Higher Secondary School

INTERESTS

- Programming
- Gaming (Dota, CS, Valorant etc.)
- Learning New Programming Languages
- Reading about Cars/Motorbikes/Self Improvement books
- Sports (Basketball, table tennis, Gym)
