SUMMARY

Full-Stack Engineer with over 3 years of experience and a Master of Applied Technologies. Proven track record in architecting scalable applications using Next.js, Node.js, and .NET. Expert in the end-to-end development lifecycle, from optimizing PostgreSQL schemas to automating CI/CD pipelines via GitHub Actions. Specialized in data-driven solutions, including the development of deep learning frameworks (Transformers/LSTMs) for predictive modeling and risk assessment. Experienced in managing cloud infrastructure across Azure and Vercel. Committed to continuous improvement and driving operational efficiency through integrated AI workflows and robust system design.

WORK HISTORY

WEB LAUNCH LIMITED

136 Broadway, Newmarket, Auckland
Jan 2025 - Present

Full stack developer

- Architected and deployed modern web applications using Next.js and Vercel.
- Engineered backend infrastructure with Supabase, implementing RPCs for complex API endpoints.
- Implemented secure backend logic and data handling protocols in Supabase to ensure compliance with modern privacy standards
- Optimized data performance using advanced SQL queries for relational data manipulation.
- Shipped real-time features like instant messaging and created responsive UI/UX designs.
- Ensured scalability and maintainability of the codebase by applying modern development best practices in a fast-paced environment.

WordPress developer

- Designed custom, responsive layouts using WordPress and Elementor.
- Managed end-to-end deployment and server performance via Hostinger.
- Enhanced digital visibility by implementing SEO best practices with SEOPress.
- Customized web environments to meet client branding requirements while maintaining fast loading speeds and user-friendly navigation.

Burger king West Gate

Auckland, New Zealand
Aug 2024 - Jan 2025

Team Member

- Operational Excellence in High-Pressure Environments: Excelled in a high-volume, fast-paced setting, maintaining 100% accuracy and composure during peak operational hours.
- Stakeholder Interaction & Communication: Cultivated advanced interpersonal skills by managing high-volume customer interactions and coordinating with diverse team members to ensure seamless service delivery.
- Adaptability & Professionalism: Rapidly integrated into the New Zealand professional environment, mastering local workplace expectations and communication styles while balancing rigorous master's studies.
- Reliability & Process Adherence: Consistently demonstrated exceptional time management and reliability, ensuring operational standards were met in a strictly regulated food-service environment.

Ek Solution Pvt. Ltd

Kathmandu, Nepal
May 2022 - Jun 2024

Frontend Cloud Developer

- Specialized in modern JavaScript frameworks, including Angular, React.js, and Next.js, to build high-performance web applications.
- Integrated advanced libraries such as Redux for state management, Tailwind CSS for modern styling, and Leaflet for interactive mapping.
- Delivered scalable frontend solutions by collaborating with design and backend teams to implement seamless user experiences.
- Utilized Cloud technologies and best practices to ensure efficient deployment and maintenance of client projects.

Ek Solution Pvt. Ltd

Kathmandu, Nepal
Jan 2022 – Mar 2024

Frontend Developer Intern

- Gained hands-on experience in professional software development workflows, focusing on core frontend technologies.
- Mastered framework fundamentals by assisting in the development of project components using React and Angular.
- Demonstrated rapid learning and technical proficiency, leading to a promotion to a full-time role within the first year.

Grid Pvt. Ltd

Kathmandu, Nepal
Mar 2017 - Jun 2018

Junior AutoCAD Draftsman

- Promoted to Junior Draftsman following the successful completion of the trainee program.
- Produced detailed structural blueprints for large-scale construction projects, including cricket stadiums and commercial buildings.
- Collaborated with engineers to develop technical drawings for memorial buildings and diverse structural frameworks.
- Ensured high levels of accuracy in blueprints to meet construction standards and project specifications

WORK HISTORY

Decision Maker [https://decision-maker-project.vercel.app/]

FEBRUARY 2026 - APRIL 2026

- Architected a decoupled Full-Stack application using a .NET Web API and Next.js, prioritizing core functionality to ensure a high-quality, releasable product within a self-imposed 8-week development cycle.
- Engineered a relational database schema in PostgreSQL, optimizing query performance and managing the end-to-end implementation from technical design to iteration.
- Developed a responsive, SEO-friendly frontend with Next.js, leveraging Server-Side Rendering (SSR) to enhance load times and user experience.
- Automated the deployment lifecycle by configuring GitHub Actions for CI/CD, enabling seamless, multi-environment deployments.
- Orchestrated cloud infrastructure by deploying the API to Azure and the frontend to Vercel, managing cross-origin resource sharing (CORS) and secure environment variables.
- Implemented secure RESTful endpoints following industry standards to facilitate efficient communication between the client-side and server-side.

QUALIFICATIONS

Master of Applied Technologies (GPA: 6.75) | Unitec Institute of Technology, Auckland

2024 – 2026

Thesis Title: “A Seq2Seq Transformer Approach for InSAR Displacement Forecasting in Gisborne, NZ”

Impact:

- Industry 4.0 & Predictive Analytics: Developed a deep learning framework using Transformer and LSTM architectures to automate risk forecasting and provide actionable insights.
- Data Integration & Quality: Engineered pipelines for Sentinel-1 satellite data, utilizing physics-informed data augmentation to achieve 92% accuracy ($SR^2=0.92$) in ground deformation modeling.
- Core Focus: Predictive Modeling, Time-series Forecasting, Geospatial Data (InSAR), and Uncertainty Quantification for operational reliability.

Core Focus:

Deep Learning, Time-series Forecasting, Geospatial Data (InSAR), and Uncertainty Quantification

Relevant Coursework:

Cloud Computing | Cyber Security | Data Analytics | SQL Databases | Machine Learning | Web Development | Research

Bachelor of Science (Hons) in Computing (Grade: First Class) | Coventry University, United Kingdom

2018 – 2022

Thesis Title: “Cloud Server Deployment for a Learning Management System (LMS) using Raspberry Pi.”

Impact:

Engineered a cost-effective, secure cloud-hosting solution for educational materials during COVID-19. Utilized Raspberry Pi, Linux (SSH), Nginx and OwnCloud to create a portable, secure server environment for remote learning.

Core Focus:

Cloud Infrastructure, Linux Administration, Network Security, and Open-Source Software

Relevant Coursework:

Kotlin | Databases | Node JS | Mongo DB | C# | Data Structures and Algorithms | Python | AGILE

TECHNICAL SKILLS

Category	Technologies & Tools
Frontend	Next.js, React, Angular, TypeScript, JavaScript, HTML5/CSS3, WordPress
Backend	Node.js, Supabase (RPC), ASP.NET MVC, Python (Machine Learning)
Database	PostgreSQL, MySQL, MongoDB, SQL Databases
Cloud & DevOps	AWS, Azure, Vercel, Docker, Linux (SSH), Git/GitHub Actions, Hostinger, Bluehost
Error Monitoring	Sentry, Datadog
AI Tooling	Cursor, Claude, GitHub Copilot, ChatGPT
Testing	Jest, Selenium, NUnit, XUnit
Design	Figma, Photoshop, Wireframe

PERSONAL SKILLS

Strong Communicator | Adaptable & Culturally Aware | Rapid Learner | Determined & Accountable | Multilingual

AWARDS & VOLUNTEERING:

GenAI Hackathon, [Unitec, Mt Albert, Auckland]:	VOLUNTEER ENROLLMENT ASSISTANT [KATHMANDU]:
Participated in rapid AI prototyping and development (Oct 2024).	Assisted with freshman intakes at Prime Higher Secondary School.
